# VIRTUAL CLASSROOM

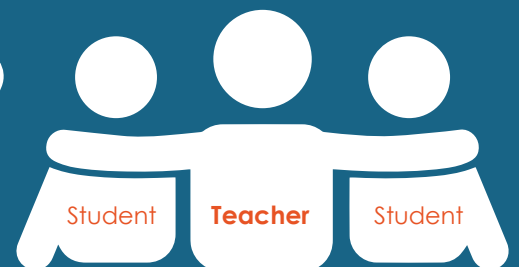

## Teach an audience in any part of the world just with a computer, an Internet connection & Core Competency's Virtual Classroom software...

Our **Virtual Classroom** software is developed using robust Adobe media technology and facilitates collaborative online meetings even over nominal bandwidths. No lease line, no V-SAT, just nominal bandwidth for collaboration among a group of people.

With **Core Competency's** Virtual Classroom software, you can arrange live classes, online lectures, web meetings, group sessions, individual one-on-one sessions and webinars—all taking place real-time over the Web.

**Core Competency's** Virtual Classroom software comes with several awesome features that are essential for seamless collaboration capabilities between presenter (teacher) and attendees (students).
